

# Mohammed Rabil T

Full Stack Developer | PHP, Laravel, CodeIgniter | React | WordPress | UAE

mohammedrabil.work@gmail.com | linkedin.com/in/mohammed-rabil | rabil-portfolio.netlify.app | +971 56 976 9023

Dubai / Abu Dhabi, UAE | Immediate Joining

## Summary

Full Stack Developer with over 3 years of experience designing, developing, deploying, and maintaining secure and scalable web applications using PHP, Laravel, CodeIgniter, React, and WordPress. Strong experience across both **product-based FinTech platforms** and **service-based client delivery environments**. Proven expertise in LMS, ERP, CRM, and Transportation Management systems with RESTful APIs, role-based access control, backend automation, and production deployments. Hands-on exposure to Docker-based deployments, containerized services, and backend workflow automation using n8n. Currently based in the UAE and available for immediate joining.

## Skills

- Programming Languages: PHP, JavaScript (ES6+), SQL
- Backend Frameworks: Laravel, CodeIgniter (MVC Architecture)
- Frontend & CMS: HTML5, CSS3, Bootstrap, Tailwind CSS, JavaScript, jQuery, React, WordPress
- Databases: MySQL (Design, Query Optimization, Indexing, Transactions)
- APIs & Integrations: RESTful APIs, Razorpay, Zoom SDK, Firebase Cloud Messaging, OpenAI API
- Cloud & Services: AWS Textract (OCR Automation), Firebase
- DevOps & Automation: Docker, n8n (Workflow Automation), Cloudflare Tunnel
- Hosting & Deployment: Linux (Basic), cPanel, hPanel (Hostinger), DNS, SSL, Git-based automated deployment
- Tools: Git, Bitbucket, Jira, Postman, Teams
- Concepts: MVC, SOLID, RBAC, Token Authentication, Laravel Sanctum, Cron Jobs, Agile/Scrum, Production Support

## Work Experience

### Laravel Developer (Product-Based FinTech Company)

Zil Money

May 2025 – Nov 2025

Manjeri, India

- Developed and maintained production-grade Laravel backend systems in a product-based FinTech environment.
- Implemented AWS Textract OCR automation within Laravel workflows, reducing manual document processing by over 60%.
- Integrated OpenAI APIs for intelligent backend data processing and validation.
- Designed and implemented secure role-based access control using token-based authentication.
- Built scheduled cron jobs and background services for automation and data synchronization.

### PHP Developer (CodeIgniter | Service-Based Company)

Trogon Media Pvt. Ltd.

Aug 2022 – May 2025

UL Cyber Park, Calicut

- Delivered client-specific web applications in a service-based IT environment using PHP and CodeIgniter.
- Developed scalable LMS and ERP platforms using CodeIgniter MVC architecture.
- Built and consumed RESTful APIs for web and third-party integrations.
- Customized and deployed WordPress websites for business and content-driven requirements.
- Integrated Zoom SDK, payment gateways, and push notification services.
- Managed end-to-end deployment including cPanel/hPanel hosting, domain pointing, DNS records, and SSL configuration.
- Optimized MySQL queries using indexing and normalization techniques.
- Provided production support, debugging, and performance optimization.

## Projects

---

### Manage-Trans – Transportation Management System | Laravel, AWS, Firebase

2025

- Developed a Transportation Management System with real-time driver location tracking and map-based visualization.
- Implemented AWS Textract OCR for automated document data extraction.
- Built secure RESTful APIs using Laravel Sanctum.
- Implemented role-based access control (RBAC), activity logging, and audit trails.
- Deployed and maintained the live system using cPanel-based hosting.
- Live Project: <https://manage-trans.com>

### Learning Management System (LMS) | PHP, CodeIgniter, Zoom SDK, Razorpay

2024

- Built a full-featured LMS supporting Admin, Instructor, and Student roles.
- Implemented authentication and authorization modules using CodeIgniter.
- Integrated Zoom SDK for live online classes and webinars.
- Implemented Razorpay payment gateway and reporting dashboards.
- Managed hosting, domain pointing, and SSL setup for production deployment.
- Live Project: <https://keralaide.com/web/login>

### Zeacut – Food Ordering E-Commerce Platform | Laravel, React, Flutter

2024

- Built backend APIs for a mobile-first food ordering platform.
- Integrated Razorpay payments and Firebase push notifications.
- Designed scalable Laravel backend architecture for concurrent orders.
- Deployed backend services and managed domain configuration using hPanel.
- Live Project: <https://zeacut.in>

### Backend Automation Workflows (Learning Project) | n8n, Docker

2025

- Built backend automation workflows using n8n for API orchestration, data processing, and notifications.
- Deployed n8n using Docker containers and Docker Compose.
- Exposed automation workflows securely using Cloudflare Tunnel.
- Automated webhook handling, scheduled jobs, and REST API integrations.

## Education

---

### Bachelor of Science in Computer Science

University of Calicut

2020 – 2023

Kerala, India

## Certifications & Training

---

- Certificate of Proficiency — IT / ITES (Web Developer, NSQF Level 7) — DDU-GKY, Govt. of India (2023)
- Web Development Certification — Zion IT Company (2023)
- Cyber Security Workshop — Kerala Police Cyberdome (2021)
- Python Main Project Certification — Zion IT Company (2022)
- 3D Printing Hands-on Workshop — IEDC (2022)
